DETAILED ACTION

Allowable Subject Matter

Claims 1, 2, 4-9, 11,12 and 14 are allowed.

The following is an examiner's statement of reasons for allowance: The prior art made of record failed to teach a method for processing a signal (IF signal filtering/conditioning) comprising mathematically reconstructing a continuous-time and continuous-value signal profile using zero crossings and phase values by way of a mathematical reconstruction algorithm using an orthogonal function system.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Perkins (US 6,795,485) discloses a spread spectrum radio receiver configurable for FSK demodulation comprising a programmable low pass filters and zero crossing detector.
